

YIELD: 1 QUART

# Homemade Disinfectant

## Spray with Bleach

Learn how to make and use a powerful household disinfectant spray with only bleach and water.

### PREP TIME

5 minutes

### ACTIVE TIME

5 minutes

### TOTAL TIME

10 minutes

### DIFFICULTY

Easy

### ESTIMATED COST

\$

## Materials

- 4 teaspoons of Bleach
- 1 quart room temperature water

## Tools

- Measuring cup
- Measuring spoon
- [Empty 1 quart Plastic Spray Bottle](#)
- 1 small funnel (helpful but not necessary)

## Instructions

Carefully pour the bleach into the spray bottle or jar first, then add the water. Mixing the solution in this order will prevent the bleach from splashing up on you.

Once the solution is mixed, place the lid tightly on the container and gently flip it back and forth a few times to mix.

After mixing, your solution is ready to use and effective for 24 hours. You can wash surfaces with soap and hot, clean water before using the bleach.

After applying the beach solution let the surface you are disinfecting air dry.

## Notes

### To clean and disinfect hard, nonporous surfaces:

- Spray directly on surfaces or apply with cloth and wet surfaces completely.
- Let stand 5 minutes.
- For heavily soiled surfaces, preclean surface before disinfecting.
